

# Hike and guided tour „Schlegeisgrund over the years“.

A cooperation with the High Alps Nature Park Zillertaler Alpen.

From July to September, you have the opportunity to take part in a guided hike with a historical perspective. Until 1965, the site of today's reservoir was home to a species-rich alpine pasture and the popular Dominikushütte located there. The hike sheds light on the unique natural environment, but also on the changes brought about by the construction of the power station and tourism. The subsequent guided tour of the 131-metre-high Schlegeis dam provides fascinating insights into the history of its construction and the generation of energy from sustainable hydropower.

**Character:** easy hike

**Duration:** approx. 4 ½ hours.

**Meeting point:** Kiosk s' Raschtl right next to the dam.

**Dates:** Mondays on 1/15/29 July, 12/26 August and 9 September 2024.

**Registration:** by 20:00 the day before in the MyZillertal app, and by 17:00 the day before at the Nature Park and the tourist offices (cash payment possible).
